

## The cookware nonstick reinforced to outlast other reinforced nonsticks!

**E**clipse® is an internally reinforced nonstick coating system that sets a new standard for resistance to abrasion and wear in cookware:

- It has three coats of nonstick, all of which are reinforced (see diagram).
- The reinforcing materials are virtually as hard as diamonds.
- On standard abrasion tests, the best conventional nonsticks reach about 20,000 cycles. Most reinforced nonsticks reach 400,000. But Eclipse passes 1,000,000 (with superb release)!
