

Whatever color combination meets your objective, all Fusion coatings can capture it for you...

Now Fusion® comes in stunning gradient combinations!

Whitford's popular Fusion family of sol-gel ceramic nonsticks can bring you all the luxurious beauty of the blended colors of expensive enamels — without the heavy price of enamel coatings! Fusion, Fusion Titanium and FusionX can all be used to achieve this effect.

All Fusion-brand coatings have always been available in a wide range of colors, and with this technique, they can be applied in any variety of combinations to achieve brilliant blends.

This gradient effect does not require special equipment and can be done by many factories and manufacturers around the world.

Fusion, with its longer-lasting non-stick and greater resistance to abusive wear, continues its trend-setting course.

For more information on any of the Fusion-brand family of coatings, contact your Whitford representative or Whitford directly at sales@whitfordww.com. Or visit our website at: whitfordww.com.
