

## 10 key facts about Xylan® Plus

**The Xylan family of spray coatings provides economical nonstick solutions for your cookware, bakeware or small electrics**

1. Ideal for Moderate, Promotional, OPP price/performance and versatility.
2. Available in 2- or 3-coat systems for longer life.
3. Provides an attractive, glossy finish.
4. Comes in a variety of colors, not just black.
5. Repels water and grease for easy cleaning.
6. Dishwasher-safe.
7. Works well on aluminum and stainless steel.
8. Applies with conventional application equipment.
9. Uses standard surface preparation.
10. Xylan Plus is included in the QCP program (for more information on this program, ask your Whitford representative).

# Not just black anymore

Choose your color from either a Pantone® or RAL® book.

You may know that Whitford manufactures the world's largest, most complete line of nonstick coatings, but you may not know that we also offer many eye-catching color options.

All Whitford consumer coatings are available in a variety of food-contact-safe colors. Ask about our special effects too. We offer spatter, high gloss, metallic, etc. Just tell us what look you are trying to achieve and we will help you get there.

## Factors to remember when requesting a color match

Review this list of factors, all of which impact the coating to be formulated:

- Select a Pantone or RAL number to ensure better matching, or provide a part or sample for the match.
- What opacity (hiding power) is desired?
- Will the coating go across the bottom exterior of the pan and, if not, what is the bottom treatment?
- Are FDA, Prop 65, EU or other regulatory compliance required?
- What is the target cost?
- Define the desired gloss.

For greater detail on Whitford's many color options, please contact your Whitford representative, or [sales@whitfordww.com](mailto:sales@whitfordww.com).
