

Industry-standard  
Dry-Egg Release Test

3 eggs  
before  
sticking

Conventional  
roller system

40 eggs before sticking

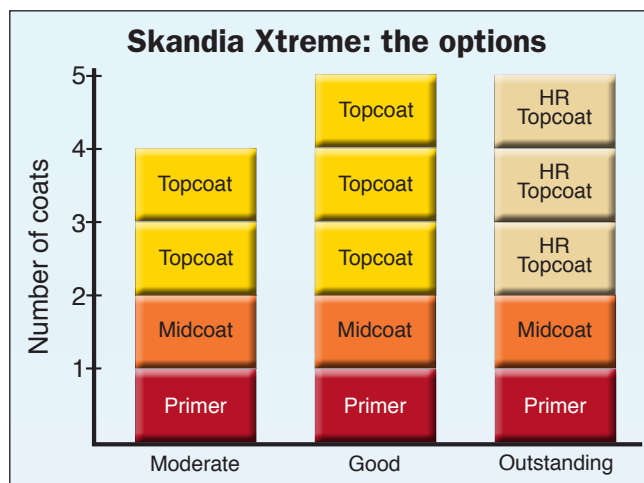

New Skandia Xtreme  
High-Release topcoat

## Skandia® Xtreme's new High-Release topcoat improves release by a factor of 13+!

Skandia Xtreme's unique basecoat improves adhesion to non-uniformly roughened surfaces. This means less time in surface preparation, improving efficiency and lowering costs.

Adding coating layers provides three different performance levels for cookware and bakeware.

The major breakthrough: Skandia's new High-Release (HR) topcoat, which increases the release dramatically — by as much as thirteen times.

Skandia Xtreme's unique system offers you three different levels of price and performance.
