

S&S Plating Operations Manager Jeff Capell (left) and Production Manager Kevin Alexander (right) receive the Recommended Coaters

Whitford reconfirms S&S Plating as a premier Custom Applicator in the U.S.

March 2017, Houston, Texas. Whitford, makers of the world's largest, most complete line of fluoropolymer coatings, has reconfirmed S&S Plating as a member of the "Whitford Recommended Coater" (WRC) program and awarded a new plaque to Jeff Capell and Kevin Alexander. Perry Poradek, industry expert for Whitford, states, "S&S Plating has been a leading provider of Whitford's Xylan® and electroplated coatings to the oilfield, power generation and automotive industries for the past 30 years."

The Whitford Recommended Coater program recognizes custom coaters who meet certain criteria. Among them: the coater must have thorough knowledge of Whitford coatings and experience in applying them, must complete a Whitford training course held at the worldwide headquarters and must have solid quality-assurance procedures in place. Coaters in the program go through rigorous audits every two years to requalify for the program.

Based in Houston, S&S Plating is equipped to handle all sorts of orders, from coating small precision parts to large, complex pieces of oilfield equipment. "Every aspect of our business is driven by the concept of quality," states George Andrews, S&S President. "We have enjoyed working with Whitford and look forward to continuing our relationship with them."
